SUMMARY

Over the past year, as a front-end developer using React.js, I, Youssef Ahmed, have been dedicated to honing my skills. Alongside my studies at Helwan University's Faculty of Engineering, I've taken on freelance projects, building educational platforms and various web tools. I've also participated in hackathons, including big ones like NASA Space Apps and IEEE competitions. These experiences have not only improved my React.js abilities but also taught me valuable teamwork and problem-solving skills in the tech world.

EXPERIENCE

Entry Front-End Developer

Frelancer.com

February 2022 - April 2023

- I freelanced in my first job to increase my knowledge and develop real project, I learned a lot and understood how working with clients, due dates and handling his requirements

junior Front-End Developer

Upwork

June 2022 - present

- Worked with Front-end and Back-end teams at Upwork and IBM. Helped transition IBM's front-end to React. Agile environment focus. Collaborated on wireframes and UI code. Skilled in JavaScript, React.js, HTML, CSS, Redux, and APIs.
